Green KREKELBERG

We have a general approach aimed at sincerely respecting our environment.

No solvent is being used (neither product nor process), energy is 100% sustainable and all waste is recycled.

As far as final products are concerned, we also give priority to environment

For a green SENSE...

- FSC-certified
- Solvent-free
- Produced with 100% green energy
- Adhesives all water-based
- Fibres are 100% cellulose (sustainable eucalyptus pulp)
- Biodegradable

OTHER SUBSTRATES (general purpose, not printing media)

FACTS ABOUT KREKELBERG

Located in the south of the Netherlands next to Belgium and German borders, KREKELBERG has manufactured covering and decorative materials for packaging and graphic art industries (+ many other applications) for several decades.

Modern production facilities and strict quality control ensure sustainable and high-quality deliveries.

A fully equipped laboratory enables us to offer fast colour-matching services. Quality, reliability and service are our priorities.

Out of our 8000 sqm factory in Maasbracht we produce more than 2 million sqm per year of graphic materials and specialty papers.

Key facts for partners:

- Long-term experience in our range of specialty papers and cardboards
- Reliability of our quality system (ISO 9001:2015)
- Our own production of fibres (flocks) allows us to be more flexible and innovative
- Strong and genuine commitment to environment-friendly attitude in every aspect
